Experience the essence of tradition with Collins Incense Sticks, a true embodiment of Korean incense craftsmanship. Distinguished from common incense sticks, Collins Incense is meticulously created using the traditional Korean "Sun-hyang" technique, foregoing the use of a bamboo core. Through this process, wood and oil are skillfully transformed into noodle-like strands, meticulously dried to perfection. Embracing this ancient manufacturing method significantly reduces the reliance on synthetic materials, with 94% natural ingredients ensuring a healthier and delicately scented product.

Every Collins Incense Stick is meticulously handcrafted by a renowned master craftsman with over 25 years of expertise, promising an immersive sensory journey like no other.
